

Take Me To Your **LEADER**

Girl Scouts of Southern Illinois build and program robots

More than 120 Girl Scouts of Southern Illinois Girl Scouts gathered at Signal Hill Elementary School in Belleville recently for the “Meet the Robots” program. During this unique Science, Technology, Engineering and Math (STEM) program, girls were introduced to the council’s five new robots and had an opportunity to build various robotic components and then program the robots to do various tasks.

The “Meet the Robots” program was made possible thanks to a \$7,500 grant from the Motorola Foundation. For girls who missed the recent robot program, but want to be a part of GSSI’s Robot Revolution, there will be another training session on Dec. 2 at the GSSI Corporate Service Center in Glen Carbon. In addition, we need volunteers to assist girls in building, programming and working with the robots...it’s fun and easy!!

For more information about this STEM program or a variety of other program opportunities, please call the Girl Scouts at 800.345.6858.
